

CSTA UK Container Self-Storage Industry Census

Please complete and send to patrick@containa.org

The CSTA is working on the **UK Container Self-Storage Industry Census** - which we plan to publish in November.

The aim of the Census is to promote the Container Self-Storage industry - and to provide relevant industry market information and data.

- Please find below the **CSTA Container Self-Storage Industry Census** form
- The short questionnaire can be completed in a **couple of minutes** and will provide us with valuable data
- Please complete and send to patrick@containa.org
- **Note – no names or companies will be identified in the Census, the report will comprise merged anonymous data only.**

We very much appreciate your support in this Census - and your contribution will help us to a representative and authoritative Industry Report.

Looking further ahead, a webinar is planned to discuss the findings of the Report; and, subsequently, there will be a press release to highlight the work and benefits of the container self-storage industry.

Thank you in advance – and best regards

Patrick
